

**4th International Conference on Environmental Science and Technology
2008**

Keynote Speaker's Biographical Sketch

Cliff Davidson, Ph.D.

Cliff Davidson received his B.S. in Electrical Engineering from Carnegie Mellon University, and his M.S. and Ph.D. degrees in Environmental Engineering Science from California Institute of Technology. His main field of research is measurement and modeling of airborne particles, especially air toxics. He served as President of the American Association for Aerosol Research during 1999-2000. He has written and edited several books, and has over 100 refereed journal publications. He is currently a Professor in the Department of Civil and Environmental Engineering and the Department of Engineering and Public Policy, and is the founding director of the Center for Sustainable Engineering at Carnegie Mellon University.
