### **NANJING NINGGAO GREEN ENERGY ENVIRONMENTAL PROTECTION INDUSTRIAL PARK, CHINA.**

Situated in Gaochun, Nanjing, belong to Ninggao High-Tech Industrial Park, Nanjing Ninggao Green Energy Environmental Protection Industrial Park was set up through coordination of many sides. Taking the development of high technology and strategic new

industries as the core, it will establish corresponding areas concentrated with Green Energy and Environmental Protection industries, emphatically bring in incubation-oriented industries, enterprised of high-tech industries and high-quality industries moved from the urban area marked by “Two retreats and three advances”. It endeavors to build itself into a carrier of high-tech achievements, a center concentrated high-tech enterprises and a base for the pioneering work of high-tech talented people.

The park has signed contracts concerning a number of energy-saving and environmentally-friendly projects such as Jiangnan Environmental Protection and Zhongzhou Environmental Protection, having initially formed the effect of congregation featured by energy-saving and environmentally-friendly industries. According to the

requirements of development integrating industries, urban areas and tourism as well as interaction for concerted advancement, it has a total area of 20 sq. km. as planned with the first-phase start-up area covering 5 sq. km. The entire start-up area has its industrial positioning as follows; (1) Research and development of high technology. (2) The headquarters of international enterprises. (3) Institutions of scientific research and incubators. (4) Software application.

In order to respond to the policies of low-carbon and development of environmentally friendly industries as well as integrate the industrial advantages of Jiangning and Gaochun, a park of environmentally friendly industries of 559.85 hectares has been set-up, bordering Cangxi Road, Shuanghu Road and Shuanggao Road. As one of the recent start-up projects of Nanjing Ninggao High-Tech Industrial Park, it will emphatically develop energy-saving and environmentally friendly industries while taking into account the development of computerized grids and machine-building industry.

Gaochun is fully connected with Nanjing, one of the four central cities of scientific research and education in China, while relying on resources of science and technology of many research institutes in Gaochun to energetically increase its soft strength. Gaochun is vigorously bringing in a batch of talented leaders in innovation of science and technology, pioneers of science and technology as well as talented people of pioneering spirit incorporated into national "1000 talented people". Inside and around the park, there are 95 institutions of higher learning of different kinds, over 700 scientific research institutes of various kinds and 28 national key labs and project centers, in addition of 79 academicians of Chinese Academy of Science and Chinese Academy of Engineering, 530,000 personnel of scientific research of various fields and 710,000 college students. Gaochun and its surrounding areas have a labor force of over one million. Powerful strength of science and education can not only directly provide talented people for the park, but also enhance the competitiveness and vigor of enterprises based on the need of enterprises through purposeful personnel training.
